ADAM JATTIEM

SOFTWARE DEVELOPER | FULL-STACK | FRONT-END | BACK-END

Cape Town, South Africa | 072 149 4199 | adamjattiem12@gmail.com
Portfolio: adam-jattiem-portfolio-v3.pages.dev | GitHub: adamjattiem12-gif | LinkedIn: adam-jattiem

PROFESSIONAL SUMMARY

Software Developer Intern at LC Studio with hands-on experience building and deploying web applications. Developed Node.js/Express REST APIs with MySQL, Python/Flask scraping and data tools, and Vue 3 interfaces. Led a four-person project team and collaborated using Git workflows. Seeking junior full-stack, front-end and back-end developer roles in Cape Town.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL, PHP, HTML5, CSS3
Back-end & databases: Node.js, Express.js, Flask, RESTful APIs, MVC, MySQL, Oracle SQL, JWT, bcrypt, web scraping
Front-end: Vue.js (Vue 3), Vue Router, Vuex, Bootstrap 5, responsive design
Tools & workflow: Git, GitHub, VS Code, npm, Render, Aiven, Cloudflare Pages

WORK EXPERIENCE

Software Developer Intern | LC Studio, Cape Town **Oct 2026 - Present**

- Apply full-stack development skills through collaborative Git workflows, debugging and code maintenance tasks.

Software Developer Trainee | Life Choices Academy (YouthCode), Cape Town **Apr - Sep 2026**

- Built individual and team web applications using REST APIs, MVC and relational databases; collaborated through Git branches, pull requests and code reviews.

SELECTED PROJECTS

FoodBoxx | Full-Stack Meal-Box Ordering Platform | Project Manager & Back-end Lead **2026**

- Led a four-person team and built Node.js/Express REST APIs with MySQL for users, products, orders and subscriptions; implemented JWT authentication and bcrypt password hashing.
- Contributed to the Vue 3/Bootstrap front end; deployed with Render and Aiven MySQL (SSL); fixed startup issues and added 15-second request timeouts and error/retry states.

Live: foodboxx.onrender.com

Market Pulse | Web Scraping & Data Dashboard | Back-end Developer **Jul - Aug 2026**

- Built Python scrapers for e-commerce and CoinGecko data, a Flask POST /api/scrape endpoint and data-cleaning utilities for a Vue dashboard.
- Handled API failures, rate limits and timeouts; collaborated on an eight-person Agile team using feature branches and pull requests.

Live: market-pulse-11gq.onrender.com | **Code:** GitHub repository

ModernTech HR Portal | Time Off Module | Developer **2026**

- Developed the Time Off interface and Express/MySQL API endpoints using MVC; fixed data-fetch issues and resolved Git merge conflicts.

Code: github.com/leratoyapi/moderntech-hr-portal

Additional projects: TutorLink (HTML/CSS/JavaScript), Vue 3 property listings app, personal portfolio (Cloudflare Pages).

EDUCATION & TRAINING

YouthCode Full-Stack Software Development Programme | Life Choices Academy | Apr 2026 - Apr 2027 (in progress)
Higher Certificate in Islamic Studies | International Peace College South Africa (IPSA) | 2025
National Senior Certificate (Diploma Pass) | Darul Islam Islamic High School | 2024

CERTIFICATIONS

Cisco Networking Academy: Introduction to Data Science and Introduction to Cybersecurity (completed); Linux Unhatched (in progress).
